STEP 4

Fill in the step-by-step form with required product details accurately and upload all the required images then click the Finish button. Once the product is added you will get a confirmation on your registered E-mail.

Note: You can limit your automobile Vehicle visibility to buyers by giving the radius parameter an appropriate Radius(in Km)

STEP 5

After your Vehicle is added it will be listed on the respective sections and available for you on your My Product page under the My Products list.

STEP 6

You can edit the product or mark it as sold out by using the respective button in the table. And you can upgrade/renew your subscription plan and update the account details in your seller account

STEP 7

If a buyer wants to buy your product you will get an E-mail intimation on your registered mail and an in-app chat functionality will be initiated with that concerned buyer through which you can make a deal to sell your vehicle.

STEP 8

Once a chat flow (Negotiation > Payment[not in-app] > Payment proof) is completed for a vehicle, that product will be marked as sold out. your product will come under the sold-out products in your seller account.
